

Michael Wenssler

Type Foundry

Michael Wenssler or Michael Wensler, operated a press at Basel between 1471 and 1490. He apparently suffered financially to the point that he fled his creditors and came to France where he managed to print a further 10 works to bring to a total an estimated 170 books. One wonders if his financial problems were due to a shift in taste for types of books, since he only printed books for the clergy, or some other problem. This font face dates to 1481.

Usage instructions

Note there a variety of ways of entering Unicode characters on each platform, and under different software. It may be worthwhile to seek different methods that suit your needs.

For Windows

1. Press and hold down the Alt key .
2. Press the + (plus) key on the numeric keypad .
3. Type the hexadecimal Unicode value .
4. Release the Alt key .

For Linux

1. Hold down control+shift+u simultaneously .
2. Type four digit code .
3. Press enter .

For Macintosh

1. Go to the Keyboard Menu tab , and enable the Unicode Hex Input check box .
2. From the keyboard menu , choose Unicode Hex Input .
3. Press the option key and type the hex-code .

Font Notes

This font is based on a historical exemplar that also includes several characters not normally encountered in modern text. These are included in the section titled latin extended-d.

Wenssler's typesetting output seems to be entirely in Latin, such that the letter eszett had to be constructed. He made occasional use of the r-rotunda form and other scribal contractions.
